

# CATCH YOU LATER.

We understand.

We really do. In this economy, there's always the temptation to shop around.

And the idea of saving a few bucks with one of those "low cost" earmold labs must be enticing. It's okay. But like others before you, you'll likely be reminded that there's more to a great earmold lab than price. Westone puts the experience of 45 years and almost 10 million earmolds into every order, with a full-time technical support staff and a focus on superior customer service. At [westone.com](http://westone.com), you can complete your earmold order form and order supplies 24 hours a day. And as long as we're discussing prices, we've held ours since 2002.

Over the years, we've found that those who venture off in search of greener pastures tend to come back.

Westone - it's earmolds and so much more.

Earmolds and more since 1959.
